MEMBER OF THE ASSOCIATED PRESS
 The Associated Press is exclusively entitled to the use for republication of all news dispatches credited to it or not otherwise credited in this paper and also the local news published herein.

A reward of \$10 will be paid for information that will lead to the arrest and conviction of parties stealing The Bonanza from subscribers.

The Bonanza is kept on file at Dempsey & Stanley, Turk and Mason streets, San Francisco.

Entered at the postoffice in Tonopah as second class matter.

OUR FOUR-FOOTED ALLIES.

INGRATITUDE is the basest trait in man. We know this to be a fact, for it was so stated in our school reader. Two-footed creatures at times possess this characteristic, but quadrupeds rarely. It often happens that if you extend a fellow man credit he buys elsewhere when he has the cash. He frequently masks the spirit of duplicity with the smile of ingratitude. But the horse puts his velvet muzzle to the ear of his kindly master and mutely registers affection. He is undemonstrative, but sincere.

The dog is almost over enthusiastic in the expression of his love and gratitude. He will follow to the end of the world to lick the hand that feeds and caresses. In Byron's Dream of Darkness is depicted the limit of fidelity in these words: "Even"—mark the even—"Even dogs forsook their masters, all save one, and he was faithful to a corpse, and it was piteous and perpetual moan. Licking the hand that answered not with a caress, he died."

The Blue Cross of Tonopah comes as champion of the cause of the dogs and horses that are helping us to win the war. The cause is one that must and will appeal to all, when it is understood. Try to understand it at once. The members of the society, which is linked with the Red Cross as is the T. A. R. and N. S. D., will be glad to instruct you. Attend their meeting at the Elks' home and you will depart with a feeling and assurance that all of war is not to wield the sabre, but that there is a gentler, a holier side, that of binding up the wounds, of bearing the stricken soldier from the battle field, of giving a tender coloring to the harsh glare of combat.

THE UNGENTLE RAINS FROM HEAVEN.

AND gosh, how she blew! The Canuck's description of a storm on one of his native lakes is applicable to what we are getting today. It is pleasing to pass for a moment from war themes to contemplate the weather. And Tonopah has weather. We got more than 200 hours of sunshine last month and it was delightful. The wind blew from San Francisco to New York and back, according to the weather expert's figures, but that wise guy also told us that it never exceeded 38 miles an hour for five consecutive minutes, so that was all right. We want it in our faces when we go to work, to awaken our faculties, and on our backs when we go home to stimulate our progress. Then it comes in handy to—demmit, it just now blew out the electricity—but the writer is a student of the touch system, and it is possible to proceed until the trouble is located and corrected.

With the wind came the rain, not a vertical, but a horizontal rain, beating and buffeting, soaking and saturating. The frost was fairly out of the ground and it caught up the moisture like a dry sponge. Every drop means a spear of bunch grass for the cattle and sheep that were getting lean and lanky for lack of nutriment. It means that the percolation through the earth out at Rye Patch will plentifully supply Tonopah through the summer. It means that the giants at Round Mountain will be enabled to disintegrate the gravel and recover the golden treasure they contain. It means that the irritating rust is washed out of the atmosphere and health conditions will be improved. To sum it all up, the present storm is a benison from Heaven.

LABOR AND FREEDOM.

THE hope of labor lies in the opportunities for freedom; military domination, supervision, checks, bondage, lie in Prussian rule. So declares the executive committee of the American Federation of Labor.

This is a right and clear conception of the issues involved in this war for the working man. It is not through a German regime but through democracy that labor is to receive adequate recognition and its realization of its rightful place in the world.

All Americans are supremely and vitally interested in the war against German autocracy and none more than the working man of America. To him freedom means everything. The test is on whether the autocratic regime of Germany has bred better men than the free institutions of this country has—whether the independent men of America can fight so well, can manufacture such guns and airplanes and other instruments and munitions of war and put them into effective use as can the human product of German rule.

There is no doubt of the result, but it depends upon the whole American people and not alone upon our fighting men. We who remain in safety at home must do our part, work, economize, save and support the finances of the government. Industry, saving, and lending to the government are now national needs and national duties.

AMERICAN AND GERMAN EFFICIENCY.

THE searchlight of war has brought out many interesting facts, and one of these is that the vaunted German efficiency will not always stand the test of comparison with American efficiency. The Germans boasted of being the greatest farmers on earth. Investigation shows that in efficiency in agriculture, measured by the produce per acre, America being graded 100, Belgium leads the world, at 205; Great Britain comes second, at 164; and Germany third, at 155; America comes fourth.

But the better test is the man test rather than the acre test, and here America leads the world by over 2 to 1. Again, grading America at 100 per farm worker, Great Britain produces 43 and Germany 41. The American farmer cultivates 27 acres, the German farmer but 7. With the aid of vast quantities of fertilizer the German produces more per acre, but he produces at a much greater cost per bushel and he produces much less than half as much per man.

PARDON REFERENCE TO PACIFIST.

IT IS contrary to the ethics of journalism to mention the name of W—m—J—s—B—n in print. The matter was talked over by the newspapers and they decided that the best way to silence this pacifist, to whose discredit will be the list of Americans slain because we did not enter the war at a time when democracy could more easily have triumphed, was to throw him into the discard and absolutely ignore him and his blatancy and hypocrisy. Over in Toronto he was hissed by loyal patriots when he attempted to make an address on something or other. Now he is about to lead the dregs into the Nationalist party, which is a sort of denatured socialism. If he leads them into deep water and they get a chill, that concerns them, not the Bonanza.

"Come out, Sammy!" cried the German raiders. Sammy came. The Fritzies suddenly remembered they had a pressing engagement elsewhere.

JACKSON HOLE AGAIN IN LIMELIGHT

(By Associated Press.)

DENVER, Colo., March 7.—Isolated Jackson Hole, in Western Wyoming, famous as one of the last western retreats and havens of refuge for train robbers, cattle thieves and other outlaws, embraces now a snowbound chapter of the Red Cross that is considered by Red Cross mountain division headquarters here the most unique in the country.

The membership of the chapter is 455 persons, scattered over a wide expanse of territory. The only outlet to Jackson Hole for eight months of the year is a single wagon road over Teton Pass. Through the winter months the members are much more accustomed to seeing herds

of from 1,000 to 2,000 elk than they are a single human besides members of their own households. Today with the exception of newspapers and telephone "The Hole" is like the rest of the West was fifty years ago.

But it is not only for the soldiers that the Red Cross chapter has been a benefit. Until it was organized, Lee Cooper, its secretary, says that motion pictures, lectures, Y. M. C. A. or Red Cross organizations never had penetrated the valley. Most houses are built of logs and snow makes travel difficult in winter, but the chapter has a record with the division headquarters for knitting and giving other supplies for the troops.

GOVERNOR KNITS IN OFFICE HOURS

(By Associated Press.)

PHOENIX, Ariz., March 7.—Gov. G. W. P. Hunt, sitting behind his mahogany desk in the executive office, placidly knitted and hummed as he received the newspaper men for their daily talk a few days ago.

The interviewers watched the governor with surprise, and finally one of them ventured a query as to what he was doing.

"Just a minute," said the governor, "don't disturb me, or I'll drop a stitch."

"Yes," he continued, when he had

filled the row he was working on. "I'll make a pair of socks for some soldier. I find it restful, as well as a way of doing my bit. I knit during my spare moments, particularly after I have been reading a while."

"I used to knit when I was a boy. The fact is, the more you knit and sweat, we turn out in Arizona, the less the burden on our knitting mills. It all of us here knitted, the Arizona soldiers would be assured an ample supply of knitted things to wear."

And the governor resumed his placid knitting.

WHALE MEAT COMING.

(By Associated Press.)

SEATTLE, Wash., March 7.—Frozen whale meat is to be shipped to all sections of the United States this year by a northern whaling company which has opened a cold storage plant at Bay City, Grays Harbor, Washington. The whale hunting season opens about April 1.

FOR FOOD FIT TO FIGHT ON.

Torpedo Boat Destroyer Davis of the U.S. Navy

The Government is just as particular in selection of foods as it is in the choice of men.

Fighting spirit, speed and strength can't be derived from poor foodstuffs. Both men and materials must be the best obtainable.

CALUMET BAKING POWDER

has been selected by the Government for Army and Navy use.

It has been accepted by the Government as meeting the critical requirements necessary in the way of strength and general perfection in purity and wholesomeness.

Calumet Baking Powder, proved, by tests, to be acceptable to the Government is surely the most acceptable baking powder for home use—the purest and surest. Use the baking powder that makes foods fit to fight on—fit for your family to grow and work on.

At your Grocer's

NAVIGATION WILL SOON BE RESUMED

(By Associated Press.)

SEATTLE, Wash., March 7.—Although Arctic ice still packs the Bering sea, northern steamship companies are already making arrangements for sending the first boats to isolated Nome and St. Michael, Alaska, as soon as the coming summer drives the bergs and floes from the steamer lanes.

In a few months probably late in June, the thousand or more people who have spent the winter at ice-bound Nome will be lined up on the beach watching for the smoke of the first steamer to come their way since last October, when winter set in.

The Alaska Steamship company's liner Victoria, a veteran of the Seattle-Nome-St. Michael run, has been spending the winter playing between this port and the Southeastern Alaska ports of Cordova, Valdez and Seward. When on her return from her present trip she will be taken off the run and given an overhauling in preparation for her summer run to the Bering points.

BANK ROBBER GIVES REPLY TRUTHFULLY

(By Associated Press.)

SPOKANE, Wash., March 7.—Robert Carl Lewis turned in a questionnaire to a local exemption board stating that he was an "expert bank robber," that bank robbery had netted him \$10,000 for the last year and that he had registered at Medical Lake, Wash. Although the Eastern Washington hospital for the criminal insane is located at Medical Lake, the exemption board began an investigation as the questionnaire had been mailed in Arkansas.

A letter from the warden of the Arkansas state penitentiary has advised the board that Lewis is a prisoner there, serving a three-year sentence for a robbery in Union county, Arkansas. Lewis registered at Medical Lake June 5, last year, and it was about that time that a Medical Lake bank was robbed of \$14,000.

By order of the Board of Directors, CHARLES D. OLNEY, Secretary.

M16

LONG STAPLE COTTON BECOMING VALUABLE

(By Associated Press.)

YUMA, Ariz., March 7.—A new factor in the production of Egyptian long staple cotton will be brought before the cotton buyers this month when the Winterhave exchange, an organization of growers near here, will offer 500 bales of this variety for sale. At the prices which prevailed last year, this amount of cotton is worth approximately \$175,000.

Arizona and the southern portion of California have recently developed a considerable cotton acreage, and it is said by cotton growers that the long fibre cotton, such as that which is to be sold, is especially valuable at this time, because it is the kind most sought after for the fabric in automobile tires and for wing fabric for airplanes.
